### 6. ACCIDENTAL RELEASE MEASURES Before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Personal Protective

Spills:

Equipment (PPE). Use safety glasses or safety goggles and race shield; use gloves and other protective clothing (e.g.,
apron, boots, etc.) to prevent skin contact.
Small Spills: Wear appropriate protective equipment including gloves and protective eyewear. Use a non-combustible,
inert material such as vermiculite or sand to soak up the product and place into a container for later disposal.
Large Spills: Keep incompatible materials (e.g., strong acids, alkalis, oxidizers) away from spill. Stay upwind and away
from spill or release. Isolate immediate hazard area and keep unauthorized personnel out of area. Stop spill or release if
it can be done with minimal risk. Wear appropriate protective equipment including respiratory protection as conditions
warrant. Recover as much free liquid as possible and collect in acid-resistant container. Use absorbent to pick up residue.
Avoid discharging liquid directly into a sewer or surface waters.
